

Wow, I can't believe this, it took us so long to finally get someone to listen to us and put this law in effect and you want to do away with it! I object to anyone trying to eliminate the "T.C.P.Act".

I use to be bombarded every day at dinner time and my children's bedtime. When I'd answer the phone and realize it was a telemarketer I would try to tell them I was not interested and to please take me off their list. Most of the time they would become very hostile and refuse to get off the phone. Hard working people coming home from work, making dinner and taking care of their children etc., do not need this!

Further, what about the people of NJ, don't we have any rights? Why do we have to endure these interruptions? I suggest you ask the people of this state who are interested in these calls to sign up for it. I'm sure there are many folks out there that may be very interested, but we're not!

Please stop this from happening!
Thank you.
